SOFTWARE DEVELOPER

Motivated and results-oriented, I am looking for a challenging position within a large organization as a Software Developer. I offer a strong foundation in software development, data analysis, and project management, with a proven ability to drive efficiency, deliver successful outcomes, and collaborate across cross-functional teams.

Software developer

KEY COMPETENCIES

Process improvement and data-driven development to optimize efficiency, quality, and decision-making strategic decisions in software development, including cost-benefit analysis.

Ability to document and communicate progress and results. Critical thinking skills to solve problems in software development. Effective communication with the team and other departments.

Strong interpersonal skills, proactivity and self-motivation, and exceptional organizational skills are outstanding for software development.

SOME PROJECTS DEVELOPED

Project: Python Applications with PySimpleGUI

I developed a repository with projects using **PySimpleGUI** for **Python**, improving my skills in different environments. The library stands out for its versatility and ease of use by addressing challenges effectively. The projects include a variety of tools such as calculator, converter, face detector, and games.
